Section 1: Identification

Product identifier

Product Name  • Ferric Sulfate Solution
Synonyms  • Iron (III) Sulfate
Molecular Formula  • Fe₂(SO₄)₃

Trade Names: Ferric Sulfate 10%; Ferric Sulfate 11%; Ferric Sulfate 12%; Ferric Sulfate 13%; 50% Ferric Sulfate; 55% Ferric Sulfate; 60% Ferric Sulfate; 65% Ferric Sulfate.

Recommended use
• Water and Wastewater Treatment; Odor Removal

Details of the supplier of the safety data sheet

Manufacturer  • ALTIVIA Chemicals, LLC
1100 Louisiana Street, Suite 4800
Houston, TX 77002
United States
www.altivia.com
customerservice@altivia.com

Telephone  • (713) 658-9000
(General)

Emergency telephone number

Manufacturer  • (800) 424-9300 - CHEMTREC for Transportation Emergencies: Account # CCN 1045

Section 2: Hazard Identification

United States (US)
According to: OSHA 29 CFR 1910.1200 HCS

Classification of the substance or mixture
OSHA HCS 2012

**Label elements**

**OSHA HCS 2012**

**WARNING**

**Hazard statements**
- May be corrosive to metals
- Harmful if swallowed

**Precautionary statements**

**Prevention**
- Keep only in original container.
- Wash thoroughly after handling.
- Do not eat, drink or smoke when using this product.

**Response**
- Absorb spillage to prevent material damage.
- IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician if you feel unwell.
- Rinse mouth.

**Storage/Disposal**
- Store in corrosive resistant/ container with a resistant inner liner.
- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

**Other hazards**

---

**Section 3 - Composition/Information on Ingredients**

**Substances**

* Material does not meet the criteria of a substance.

**Mixtures**

**Section 4: First-Aid Measures**

**Description of first aid measures**

**Inhalation**
- Move victim to fresh air. Administer oxygen if breathing is difficult. Do not use mouth-to-mouth method if victim inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a
one-way valve or other proper respiratory medical device. Give artificial respiration if victim is not breathing. Get medical attention immediately.

**Skin**
- For minor skin contact, avoid spreading material on unaffected skin. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Remove and isolate contaminated clothing. Get medical attention immediately.

**Eye**
- In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. Get medical attention immediately.

**Ingestion**
- If swallowed, rinse mouth with water (only if the person is conscious) Do NOT induce vomiting. Do not use mouth-to-mouth method if victim ingested the substance. Obtain medical attention immediately.

**Most important symptoms and effects, both acute and delayed**
- Refer to Section 11 - Toxicological Information.

**Indication of any immediate medical attention and special treatment needed**
- All treatments should be based on observed signs and symptoms of distress in the patient.
- Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

**Section 5: Fire-Fighting Measures**

**Extinguishing media**

**Suitable Extinguishing Media**
- LARGE FIRES: Dry chemical, CO2, alcohol-resistant foam or water spray.
- SMALL FIRES: Dry chemical, CO2 or water spray.

**Unsuitable Extinguishing Media**
- No data available

**Special hazards arising from the substance or mixture**

**Unusual Fire and Explosion Hazards**
- Containers may explode when heated.

**Hazardous Combustion Products**
- Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive fumes.

**Advice for firefighters**
- Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible.
- Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection.
- Wear positive pressure self-contained breathing apparatus (SCBA).
- SMALL FIRES: Move containers from fire area if you can do it without risk.

**Section 6 - Accidental Release Measures**

**Personal precautions, protective equipment and emergency procedures**

**Personal Precautions**
- Ventilate enclosed areas. Do not walk through spilled material. Use appropriate Personal Protective Equipment (PPE) Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

**Emergency Procedures**
- ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).
- As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. Keep unauthorized personnel away. Stay upwind. Keep out of low areas. Do not get water inside container.

**Environmental precautions**
- Avoid run off to waterways and sewers.
Methods and material for containment and cleaning up
Containment/Clean-up • Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers.

Section 7 - Handling and Storage

Precautions for safe handling
Handling • Review the label, this SDS and any other applicable information before use. Handle and open container with care. Use only with adequate ventilation. Keep separated from incompatible substances. Use appropriate Personal Protective Equipment per Section 8. Handle only with equipment, materials and supplies specified by their manufacturer as being compatible and appropriate for use with this product. Do not get in eyes. Avoid contact with skin. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

Conditions for safe storage, including any incompatibilities
Storage • Prevent material from coming in contact with common metals. Ensure that all storage vessels are labeled. Store only in dry rubber-lined, plastic, FRP (fiberglass) or stainless steel (304,316) Keep storage temperatures between 10° and 40°C Store away from incompatible materials such as alkalis. Keep smaller containers (drums and totes) tightly closed when not in use or when empty. Product should be used within one year. Storage facilities should have secondary containment as required by law or regulation. Storage tanks, piping and offloading points should be labeled with appropriate signage to avoid accidents. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product.

Section 8 - Exposure Controls/Personal Protection

Control parameters

<table>
<thead>
<tr>
<th>Exposure Limits/Guidelines</th>
<th>Result</th>
<th>ACGIH</th>
<th>NIOSH</th>
<th>OSHA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sulfuric acid (7664-93-9)</td>
<td>TWAs 0.2 mg/m3 TWA (thoracic fraction)</td>
<td>1 mg/m3 TWA</td>
<td>1 mg/m3 TWA</td>
<td></td>
</tr>
</tbody>
</table>

Exposure controls
Engineering Measures/Controls • Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal Protective Equipment
Respiratory • In case of insufficient ventilation, wear suitable respiratory equipment.
Eye/Face • Wear protective eyewear (goggles, face shield, or safety glasses).
Skin/Body • Wear appropriate gloves. Wear long sleeves and/or protective coveralls.
Environmental Exposure Controls • Follow best practice for site management and disposal of waste. Controls should be engineered to prevent release to the environment, including procedures to prevent spills, atmospheric release and release to waterways.

Key to abbreviations
ACGIH = American Conference of Governmental Industrial Hygiene
NIOSH = National Institute of Occupational Safety and Health
OSHA = Occupational Safety and Health Administration
TWA = Time-Weighted Averages are based on 8h/day, 40h/week exposures

### Section 10: Stability and Reactivity

#### Reactivity

- No dangerous reaction known under conditions of normal use.

#### Chemical stability

- Stable under normal temperatures and pressures.

#### Possibility of hazardous reactions

- Hazardous polymerization will not occur.

#### Conditions to avoid

- Excess heat.

#### Incompatible materials

- Carbon Steel, Brasses, Aluminum, & Nylon.

#### Hazardous decomposition products

- Thermal decomposition; after completely dry and heated to decomposition will produce oxides and sulfur.

### Section 11 - Toxicological Information

#### Information on toxicological effects

**Other Material Information**

- Although Ferric Sulfate is manufactured with the use of Sulfuric Acid, the residual amount of sulfuric acid is less than 0.25% active in the finished Ferric Sulfate product. The following statements in regards to Sulfuric Acid are indicative of concentrated acid level of greater than 5% and are not anticipated as potential health effects of the Sulfuric Acid concentrations in the finished product known as Ferric Sulfate.

<table>

</tbody>
</table>

Preparation Date: 04/March/2016
Revision Date: 05/March/2019
Format: GHS Language: English (US) OSHA HCS 2012
Potential Health Effects

Inhalation

**Acute (Immediate)**
- Concentrated sulfuric acid can be corrosive to the nose, mucous membranes, and respiratory tract. Inhalation of the vapors or mist can cause pulmonary edema, emphysema or permanent changes in pulmonary function.

**Chronic (Delayed)**
- No data available

Skin

**Acute (Immediate)**
- Sulfuric acid is corrosive to the skin.

**Chronic (Delayed)**
- No data available

Eye

**Acute (Immediate)**
- Sulfuric acid is corrosive to the eyes.

**Chronic (Delayed)**
- No data available

Ingestion

**Acute (Immediate)**
- Harmful if swallowed.

**Chronic (Delayed)**
- No data available

Other

**Chronic (Delayed)**
- Chronic exposure to sulfuric acid has been reported to be associated with dermatitis, chronic bronchitis, gastritis, erosion of dental enamel, conjunctivitis, increased frequency of respiratory tract infections and cancer of the larynx, lungs and upper respiratory tract.

Carcinogenic Effects
- The International Agency for Research on Cancer (IARC) has classified "strong inorganic acid mists containing sulfuric acid" as a known human carcinogen (Category 1). This classification is for
inorganic acid mists only and does not apply to sulfuric acid or sulfuric acid solutions. The basis for the IARC classification rests on several epidemiology studies which have several deficiencies. These studies did not account for exposure to other substances, some known to be animal or potential human carcinogens, social influences (smoking or alcohol consumption) and included small numbers of subjects. Based on the overall weight of evidence from all human and chronic animal studies, no definitive causal relationship between sulfuric acid mist exposure and respiratory tract cancer has been shown.

Key to abbreviations
LC = Lethal Concentration
LD = Lethal Dose
TC = Toxic Concentration

Section 12 - Ecological Information

Toxicity
• Non-mandatory section - information about this substance not compiled.

Persistence and degradability
• Non-mandatory section - information about this substance not compiled.

Bioaccumulative potential
• Non-mandatory section - information about this substance not compiled.

Mobility in Soil
• Non-mandatory section - information about this substance not compiled.

Other adverse effects
• Non-mandatory section - information about this substance not compiled.

Section 13 - Disposal Considerations

Waste treatment methods
Product waste • Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Packaging waste • Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Section 14 - Transport Information

<table>
